ProSense Group
Industrial supply and engineering

ProSense Pty Ltd supplies industrial equipment across Australia from its Brompton head office. Our engineering and software teams help customers integrate instruments, control systems and multi-site monitoring.

Acrel energy metering

Coolmay controllers

RIGOL test equipment

What the Group supplies

ProSense Instruments

Equipment distribution

Process instruments, electrical test equipment, drives and automation components. Specify quantities, required dates, approved models and delivery locations.

prosenseinstruments.com.au

ProSense Solutions

Engineered monitoring and control

Field devices, PLCs, HMIs and communications for a defined site requirement. Agree the integration, commissioning and handover scope in the project brief.

prosense.com.au

ProSight Software

Telemetry, alarms and SCADA

Connect supported devices and gateways to operational dashboards, alarms and historical trends. Scope the points, user roles and reporting requirements across sites.

Procurement and project delivery

For a multi-site rollout or tender package, identify the supply boundary and the person who can approve each substitution.

Equipment schedule	Send the manufacturer and part number, quantity, delivery postcode and required stage. For replacements, include the installed nameplate and mounting details.
Interfaces and approval	Record the measurement range, electrical supply, signals, protocols and receiving system. Identify substitutions that need approval before ordering.
Documents and handover	List the datasheets, manuals, drawings or calibration evidence required against each model. Agree who owns the functional checks and final acceptance.

Selected supply experience

Silangan Mining Corporation, Philippines. ProSense supplied industrial equipment for mining instrumentation requirements.
Read the mining supply record

Australian electrical trade. An electrical wholesaler purchased a stainless-steel Pt1000 probe. The record identifies the sensing element and procurement context.

Head office

Unit 3, 40 First Street, Brompton SA 5007

Industrial equipment supply

ProSense Instruments supports equipment selection, replacement parts and staged purchasing for engineering contractors, maintenance teams and electrical wholesalers.

Process measurement

Flow, pressure, level, temperature and water quality. Specify the fluid, range, process connection, signal and operating conditions.

Power and automation

Electrical test instruments, submetering, current transformers, PLCs, HMIs and drives. Include circuit ratings, motor nameplates and the required control interface.

Remote monitoring

Data loggers, wireless sensors and gateways for cold storage, buildings and remote assets. Identify the measurement points, reporting interval, site power and coverage.

Organisations supplied

T2D Alliance, ACCIONA, John Holland, Fremantle Ports, Transgrid and BHP.
