Supply and service scope

ProSense Instruments supplies industrial measuring equipment and components. ProSense Solutions scopes and configures monitoring and control systems. ProSight Software supports industrial monitoring and digital platforms.

For multi-site procurement, provide the assets, quantities, delivery postcodes and rollout dates for each site. Ask for separate equipment, software, configuration, installation and commissioning line items. The issued quotation identifies the agreed scope and responsibilities.

Procurement and controlled documents

Contact Sales on 1800 560 854 or sales@prosense.com.au. For vendor onboarding, identify your organisation, tender or purchase reference, required document, expiry requirements and due date.

Request insurance evidence, supplier forms or product-specific certificates through the project contact. Finance maintains financial and insurance source records. Distribution maintains supply and product documentation. Scope and release are confirmed for each request.
